Designing Services

With hands on knowledge in website designing, the experts at DigiWorld Creative (DWC) provide the clients with design, building, publishing and management of websites. Whether it is design of small brochure websites or large dynamic, function websites, trust in DWC and we will provide you professional, utilitarian and user-friendly websites. Also, we will provide you the ability to publish as well as manage your website and its contents using our CMS services. In case you want to power up your websites with transactional abilities or are looking for a makeover to an e-commerce website, DigiWorld Creative has the best solution for you with the industry specific website platforms for membership organizations, associations, recruitment companies and retail businesses

Core Testing

DigiWorld Creative Core Testing Services are offered as a seamless extension to your in-house IT and business testing capabilities. We work closely with you to tailor a program of support which meets your needs and ensures your systems achieve the quality levels demanded by your customers. Our services range from supplementing in-house skills through to outsourcing the entire QA function to an offshore facility. We provide complete support to help you meet the demands of your business and are careful to recommend solutions that do not impact upon your ability to deliver. Most importantly we supplement the in-house QA function, recognizing gaps and providing a response to the challenges of delivering new business systems. Our services extend much further than staff augmentation. A key factor in any engagement is the continuous improvement and the development of your own staff. We will work with you to apply improvements to your system's lifecycle, minimizing the cost of testing whilst at the same time optimizing the process to improve the quality of delivered systems. Working with DWC will add flexibility and know-how to your QA and testing capability, but most importantly it will ensure your business stays on track. Core Testing Services Summary: DWC is an independent global testing services division assures our commitment to delivering value and quality to our clients in a professional and confidential manner. As a specialist provider of testing services, we continually strive to innovate, improve and expand our services to our clients. At DWC, we recognize that the cost-effective identification and removal of software defects from our clients' software and IT systems is our primary objective and is the core of our business. This is why we have an extensive range of Core Testing services that bring together all the essential testing capabilities required to meet your objective

Tools

Our expertise in the publishing domain puts us in a unique position to conceptualise and deliver workflow solutions that maximise the return.
